

# Why You Should Drink Warm Water & Lemon

The way you start each day is incredibly important. Whether you're a mom, a coach, a writer, a small business owner or a yoga teacher, what you do first thing in the morning matters. Your mind may say you have to check emails, take the dog out, get the kids out the door, that you can't be late for work or that you just don't have enough time to cultivate your own morning rituals. But, if you can only make time for one ritual that will improve your health, let it be this.....

## **Start the day out with a mug of warm water and the juice of half a lemon.**

It's so simple and the benefits are just too good to ignore. Warm water with lemon:

### **1. Boosts your immune system**

Lemons are high in Vitamin C and potassium. Vitamin C is great for fighting colds and potassium stimulates brain and nerve function and helps control blood pressure.

### **2. Balances pH**

Lemons are an incredibly alkaline food, believe it or not. Yes, they are acidic on their own, but inside our bodies they're alkaline (the citric acid does not create acidity in the body once metabolized). As you wellness warriors know, an alkaline body is really the key to good health.

### **3. Helps with weight loss**

Lemons are high in pectin fiber, which helps fight hunger cravings. It also has been shown that people who maintain a more alkaline diet lose weight faster. And, my experience is that when I start the day off right, it's easier to make the best choices for myself the rest of the day.

### **4. Aids digestion**

The warm water serves to stimulate the gastrointestinal tract and peristalsis—the waves of muscle contractions within the intestinal walls that keep things moving. Lemons and limes are also high in minerals and vitamins and help loosen ama, or toxins, in the digestive tract.

### **5. Clears skin**

The vitamin C helps decrease wrinkles and blemishes. Lemon water purges toxins from the blood which helps keep skin clear as well.

### **6. Hydrates the lymph system**

This cup of goodness helps start the day on a hydrated note, which helps prevent dehydration (obviously) and adrenal fatigue. When your body is dehydrated, or deeply dehydrated (adrenal fatigue) it can't perform all of its proper functions, which leads to toxic buildup, stress, constipation, and the list goes on. Your adrenals happen to be two small glands that sit on top of your kidneys, and along with your thyroid, create energy.

Adopting just this one practice of drinking a cup of warm water with the juice from half a lemon for a month can radically alter your experience of the day. Don't be surprised if you begin to view mornings in a new light.
